

Natural Cinders is the leading sealing solution for hydropower and water treatment plant owners worldwide when it comes to dewatering applications. Whether you are taking a unit off line, minimizing ice buildup, or dewatering a cofferdam, Natural Cinders is the most effective and environmentally friendly solution!

Offered in 1000 kg and 20 kg bags throughout the globe, Natural Cinders is the most cost effective solution when sealing is required. Since 1985, J.M. Power Aggregates has provided solutions for many hydropower owners and WTP owners throughout Canada, United States and Europe.

Natural Cinders, the leading sealing solution worldwide.
